S. Patent and Trademark Office TO-326 (Rev. 04-01) Office A	Action Summary	Part of Paper No. 8		

Art Unit: 1773

DETAILED ACTION

Election/Restrictions

1. Claims 6-7 withdrawn from further consideration pursuant to 37 CFR 1.142(b), as being drawn to a nonelected method, there being no allowable generic or linking claim. Applicant timely traversed the restriction (election) requirement in Paper No. 7.

Claim Objections

2. Claims 3 and 8 are objected to because of the following informalities: claims 3 and 8 define x as " $0 < x \cdot 1$ ". It is not clear to the examiner what this phrase means and for purposes of examination it has been assumed that Applicant intended to claim " $0 < x \le 1$ ". Appropriate correction is required.

Claim Rejections - 35 USC § 112

- 3. The following is a quotation of the second paragraph of 35 U.S.C. 112:
 The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.
- 4. Claims 1-5 and 8-9 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claims 1, 3, 4, 8 and 9 are rendered indefinite by the phrases "spinel-type" and "NaCl-type." The term "type" renders an otherwise clear and definite phrase indefinite because it is not clear if the claims are limited to spinel and NaCl crystalline structures.

Application/Control Number: 09/976,296

Art Unit: 1773

Claim 5 lacks antecedent basis for "said underlayer" in line 2. Claim 1, from which claim 2 depends, does not set forth an underlayer as a component of the recording medium.

Claims 2 and 8 are rendered indefinite by the units for resistance of "1.5 M•". It is not clear to the examiner what this unit measurement is and what it is equivalent to. Without an understanding of the meaning of this limitation, the examiner was unable to examine this limitation on the merits.

Claim Rejections - 35 USC § 103

- 5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 6. Claims 1, 3-5, and 9 are rejected under 35 U.S.C. 103(a) as being unpatentable over Tamari et al. (EP 0673021) in view of Usuki (US 6525908).

Tamari et al. disclose a magnetic recording medium containing a Co-containing spinel iron oxide (i.e., maghemite) disposed on top of a substrate and having a layer of NiO in between (see abstract). In one example, the coercive force of a medium with a Co containing spinel iron oxide film having a thickness of 40.8 nm is 2000 Oe.

The reference is silent with respect to the particular values of Ra and Rmax of the magnetic surface.

Usuki discloses a magnetic recording medium having a defined values of Ra and Rmax such that high electromagnetic transfer characteristics are ensured (col. 7, lines 38-41).

Application/Control Number: 09/976,296

Art Unit: 1773

It would have been obvious to one of ordinary skill in the art at the time of invention to

Page 4

optimize the roughness parameters noted above for the magnetic layer taught by Tamari et al. in

order to provide a medium having high electromagnetic transfer characteristics.

7. Any inquiry concerning this communication or earlier communications from the

examiner should be directed to Holly Rickman whose telephone number is (703) 305-2642. The

examiner can normally be reached on Monday-Friday 9:30-6:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's

supervisor, Paul J. Thibodeau can be reached on (703) 308-2367. The fax phone numbers for the

organization where this application or proceeding is assigned are (703) 872-9310 for regular

communications and (703) 872-9311 for After Final communications.

Any inquiry of a general nature or relating to the status of this application or proceeding

should be directed to the receptionist whose telephone number is (703) 308-0661.
